

SOC 2 TYPE II SECURITY AUDIT REPORT — SECTION 1

Trust Services Criteria Evaluation for Section 1: The audit examined controls across Security, Availability, and Confidentiality. For control CC1.1, independent auditors confirmed continuous automated configuration tracking and zero critical non-conformities across all production assets. Penetration test results yielded zero high-severity findings during the testing window from October 1 to December 31, 2025.

SOC 2 TYPE II SECURITY AUDIT REPORT — SECTION 2

Trust Services Criteria Evaluation for Section 2: The audit examined controls across Security, Availability, and Confidentiality. For control CC2.1, independent auditors confirmed continuous automated configuration tracking and zero critical non-conformities across all production assets. Penetration test results yielded zero high-severity findings during the testing window from October 1 to December 31, 2025.

SOC 2 TYPE II SECURITY AUDIT REPORT — SECTION 3

Trust Services Criteria Evaluation for Section 3: The audit examined controls across Security, Availability, and Confidentiality. For control CC3.1, independent auditors confirmed continuous automated configuration tracking and zero critical non-conformities across all production assets. Penetration test results yielded zero high-severity findings during the testing window from October 1 to December 31, 2025.

SOC 2 TYPE II SECURITY AUDIT REPORT — SECTION 4

Trust Services Criteria Evaluation for Section 4: The audit examined controls across Security, Availability, and Confidentiality. For control CC4.1, independent auditors confirmed continuous automated configuration tracking and zero critical non-conformities across all production assets. Penetration test results yielded zero high-severity findings during the testing window from October 1 to December 31, 2025.

SOC 2 TYPE II SECURITY AUDIT REPORT — SECTION 5

Trust Services Criteria Evaluation for Section 5: The audit examined controls across Security, Availability, and Confidentiality. For control CC5.1, independent auditors confirmed continuous automated configuration tracking and zero critical non-conformities across all production assets. Penetration test results yielded zero high-severity findings during the testing window from October 1 to December 31, 2025.

SOC 2 TYPE II SECURITY AUDIT REPORT — SECTION 6

Trust Services Criteria Evaluation for Section 6: The audit examined controls across Security, Availability, and Confidentiality. For control CC6.1, independent auditors confirmed continuous automated configuration tracking and zero critical non-conformities across all production assets. Penetration test results yielded zero high-severity findings during the testing window from October 1 to December 31, 2025.

SOC 2 TYPE II SECURITY AUDIT REPORT — SECTION 7

Trust Services Criteria Evaluation for Section 7: The audit examined controls across Security, Availability, and Confidentiality. For control CC7.1, independent auditors confirmed continuous automated configuration tracking and zero critical non-conformities across all production assets. Penetration test results yielded zero high-severity findings during the testing window from October 1 to December 31, 2025.

SOC 2 TYPE II SECURITY AUDIT REPORT — SECTION 8

Trust Services Criteria Evaluation for Section 8: The audit examined controls across Security, Availability, and Confidentiality. For control CC8.1, independent auditors confirmed continuous automated configuration tracking and zero critical non-conformities across all production assets. Penetration test results yielded zero high-severity findings during the testing window from October 1 to December 31, 2025.

SOC 2 TYPE II SECURITY AUDIT REPORT — SECTION 9

Trust Services Criteria Evaluation for Section 9: The audit examined controls across Security, Availability, and Confidentiality. For control CC9.1, independent auditors confirmed continuous automated configuration tracking and zero critical non-conformities across all production assets. Penetration test results yielded zero high-severity findings during the testing window from October 1 to December 31, 2025.

SOC 2 TYPE II SECURITY AUDIT REPORT — SECTION 10

Trust Services Criteria Evaluation for Section 10: The audit examined controls across Security, Availability, and Confidentiality. For control CC10.1, independent auditors confirmed continuous automated configuration tracking and zero critical non-conformities across all production assets. Penetration test results yielded zero high-severity findings during the testing window from October 1 to December 31, 2025.
